

# TICO WHITE PAPER

TOPINVESTMENTCOIN

## Introduction

Topinvestmentcoin(TICO) is designed to implement an Ethereum blockchain-based token to execute a decentralized investment in a digital currency called Topinvestmentcoin. Project is a proposed system that uses the blockchain technology and leverages smart contract techniques using Ethereum's core innovation including security and immutability. With Topinvestmentcoin you will have access to marketplace for ask&bid including the investment platform which earns you 3% interest monthly income for every investors. It's NOT Pyramid/HYIP, all payments are made from special fund.

# 1. BENEFITS

When the application is decentralized, everyone in the Ethereum blockchain can benefit from immutability. This means that a third party is not allowed to make any changes to data. The applications based on the principle of Ethereum smart contract are protected against tamper and corruption. The network is using cryptography for security which protects the Ethereum-based network from fraudulent activities and hacking attacks.

Additionally, there's no central point of failure and the network can never go down nor be switched off. A decentralized service has a future of unimagined possibilities where hundreds of market sectors such as Real Estate, Insurance and Finance can find excellent opportunities in the blockchain market when plugged into the Ethereum network. The platform presented in this paper attempts to define the protocols in Ethereum and proposes a stable cryptocurrency system based on Ethereum smart contract to address the existing real-world currency challenges.

People recognizing the value of cryptocurrency technology and joining the

cryptocurrency ecosystem widely recognize the drawbacks surrounding the existing monetary system and stable currency. These drawbacks include the increase likelihood of fluctuations in the value of their wealth in the real-world currency. While these fluctuations are typically small when compared to cryptocurrency they are still worth noting. For instance, a stable currency like USD is subject to devaluation due to economic inflation whereas, cryptocurrency continue to mitigate issues surrounding stability of value.

Cryptocurrency technology promotes immediate settlement especially to demanding sectors such as Insurance and Real Estate. For example, purchasing real estate properties will typically involve a third party such as a notary and lawyers. Not to mention the payment of fees and delays that are involved in the process, Ethereum smart contracts are enforced and designed to eliminated third party approvals and reference external facts to complete necessary purchase procedures at a specific time for a fraction of the expense required for asset transfers. In a decentralized environment, everyone can expect lower to no transaction fees for services and cryptocurrency exchanges since everyone is already compensated by the Ethereum network

Cryptocurrency is widely recognized at a universal level. This means physical and digital goods and services can be sold and purchased without transaction charges, interest rates nor government regulations when done in different geographic locations. Anyone who wants to engage their products and services in the blockchain technology has free access to the open marketplace in an international level without experiencing any problems. Ethereum operates at a universal level which makes every transaction simple and easy.

The biggest advantage of a stable cryptocurrency system is perhaps recognized by merchants and traders from different market sectors. Ethereum-based environment allows them to achieve mutual exposure to publicly list their organizations and offered services.

It provides an innovative platform that uses the smart contract for fast processing, and un-interruptive processing to consumers while boosting the organization's reputation, legitimacy and public status by accepting Topinvestmentcoin. Both consumers and vendors will get an online advantage of using Ethereum-based network. A stable Ethereum-based marketplace can allow merchants to use the applications to cut down showrooms while consumers get their best deals in a secure and convenient manner. Having introduced the basic concepts behind Ethereum technology, we will discuss how the proposed project can bring a huge difference to the market sector. This paper is organized as follows:

**TOPinvestmentcoin**

## 2. TICO ICO

(1) Topinvestmentcoin will have 30,000,000,000 coin which 15,000,000,000 coin will be available for circulation ,during ICO each Topinvestmentcoin will be sold for \$0.00045

TOPINVESTMENTCOIN

# TICO BOUNTY

(2)a) 45,000 Topinvestmentcoin reward for making clear and perfect review on YouTube about Topinvestmentcoin This offer is available for all participants.

(2)b) 500 Topinvestmentcoin reward when you refers for each. This means one person can refer more than 1

(3) POSSIBLE ESTIMATED PRICE AFTER ICO! at least \$0.005 ↑

**TOPinvestmentcoin**

# 3. Road Map

(1) Creation of website

**TOPinvestmentcoin**

(2) Creation of Token and smart contract deployment

(3) Announcements

(4) ICO opening and end time ( closed after 100,000 verified member).

(5) Exchange listing and coinmarketcap

**TOPinvestmentcoin**

(6) creation of Investment platform to make monthly income (coin for investment coin for rewards)

(7) Store (Able to purchase goods with your coin

(8) Availability of gift card / debit & credit card

# 4. ICO TERMS:

**TOPINVESTMENTCOIN**

(a) Minimum threshold is \$5.5M

(b) Minimum verified user must be 100K

(c) Total fund needed is \$8.5M

(d) All ICO participants get 5% bonus on every purchase

Topinvestmentcoin welcome to the new generation of currency
